The Commissioner of Patents

Serial No. 10/532,138

REMARKS

Claims 1, 3 to 6, 8, 10 to 21, and 32 to 37 are in the case.

In the Advisory Action, Continuation of 3, it is indicated that the amendments to claim 1 raise new issues by changing the ranges of values in formula (O) which would require further consideration and search. It is also indicated that the amendment to claim 1 raises an issue of new matter as "it is unclear to the examiner where the new ranges of n, t, and p were disclosed in the specification".

As indicated at page 11 of the submission in response to the Final Action, the limitations of values in claim 1 result in the cation of the compound of claim 10 indicated as being allowable as well as that of claim 32. These values are thus supported by the teachings relating to the compound of claim 10. In particular, it is noted that there are no "new ranges" for n, t, and p; rather there are specific values, i.e., 5, 3, and 5 respectively, which are the values in the compound of claim 10.

The application is believed to be in condition for allowance, and early and favourable action would be appreciated.

Respectfully,

THOMAS Q. HU ET AL
